# Generative AI (GenAI) Visuals in Photoshop and Firefly — Labs

Generative AI (GenAI) Visuals in Photoshop and Firefly

TGS-2024045220 · Version 7 · 21 August 2026

Course code: TGS-2024045220

Version: v7 · 21 August 2026

Each lab is self-contained. Open its folder, read the guide, and work only on the supplied PSD/JPEG assets. Save all outputs inside the same lab folder or your trainer-approved workspace.

# Lab sequence

**1.** Lab 01 — Prompt-to-Image Visual Brief — Translate an audience brief into a controlled Firefly prompt set and selected visual direction.

**2.** Lab 02 — Design Principles and Prompt Refinement — Use Photoshop layout evidence to refine a generated visual against hierarchy, balance and contrast criteria.

**3.** Lab 03 — Composition and Style References — Create a controlled Firefly comparison using composition and style references independently and together.

**4.** Lab 04 — Storyboard and Task Flow — Build a five-frame Firefly storyboard and a team task flow that communicates intent and ownership.

**5.** Lab 05 — Generative Fill: Directed Inpainting — Use a controlled selection and Generative Fill to add, replace and remove content non-destructively.

**6.** Lab 06 — Background Replacement and Harmonize — Generate a new background, integrate a placed element and evaluate lighting, perspective and contact.

**7.** Lab 07 — Generative Expand for Channel Ratios — Extend one master visual into square, landscape and portrait variants without losing hierarchy.

**8.** Lab 08 — Reference Image and Multi-Prompt Composition — Use a permitted reference image and staged selections to construct a coherent multi-element composition.

**9.** Lab 09 — Restoration, Critique and Colour Strategy — Restore a damaged image, evaluate invented detail and develop a reversible colour treatment.

**10.** Lab 10 — Wellness Campaign Capstone — Integrate A1–A7 into an editable campaign visual, storyboard summary, critique and colour-delivery package.
