Lab 10 — Wellness Campaign Capstone

Generative AI (GenAI) Visuals in Photoshop and Firefly

TGS-2024045220 · Version 7 · 21 August 2026

Course: Generative AI (GenAI) Visuals in Photoshop and Firefly (TGS-2024045220)

Version: v7 · 21 August 2026

Scenario

Fictional Wellness Week Singapore 2026 needs a coherent hero visual and three channel exports for a positive, inclusive message.

Objective

Integrate A1–A7 into an editable campaign visual, storyboard summary, critique and colour-delivery package.

Supplied Photoshop/JPEG files

- wellness-campaign-reference.jpg
- wellness-campaign-start.psd

Detailed procedure

1. Open the starter PSD, save lab10-capstone.psd and write a brief naming audience, message and channels.

2. Explore at least two Firefly directions; record prompt, model, references and selection rationale.

3. Integrate the selected result with the supplied PSD using named layers, masks and generated layers.

4. Create a three-frame storyboard strip showing problem, restorative action and outcome/CTA.

5. Ask a peer to evaluate hierarchy, inclusivity, aesthetics, technical finish and message fit; record the feedback.

6. Propose and implement at least two traceable enhancements based on the critique.

7. Create a role-based colour strategy with primary, secondary and accent swatches plus reversible adjustment layers.

8. Export square, landscape and portrait JPEGs; reopen each and record dimensions, colour profile and visual verification.

Evidence to retain

Layered master PSD, prompt log, storyboard strip, peer critique, enhancement record, palette and three verified JPEGs.

Acceptance criteria

- ■ The package visibly demonstrates A1–A7.

■ All adjustments and generated elements remain editable and named.

■ Three exports are reopened and pass dimension, colour and visual checks.

■ Provenance and asset-permission notes accompany delivery.

Reflection prompts

• Which decision most improved the message or focal hierarchy?

• How does the Layers panel prove that the workflow remains editable?

• What rights or provenance evidence must accompany the finished image?
